End-to-end: from strategy, technology and data to organisation and transformation. We work on this every day with more than 2.000 colleagues at our global locations in Europe, North America and Asia.

Become a pioneer of digital transformation and join our fantastic team.

IT Consultant (all genders) Content Management Systems

[Apply now](#)

YOUR TASKS

As an IT Consultant (all genders) in the CMS environment, you are a technical advisor and professional expert for our customers from various industries, from the initial contact to the live launch and beyond.

You record the customer's requirements and enter into technical sparring with our development unit regarding these requirements and testing.

In the role of a product owner, you take responsibility for optimal e-commerce solutions and can at least read code.

You are part of the project team that also supports sales, sketches solutions from concrete project events and analyses and discusses them with the customer in terms of content and expertise.

YOUR PROFILE

You are enthusiastic about agile project structures, new methodological approaches and a modern technology stack.

You have relevant professional experience as an IT consultant, technical product owner, business analyst or software architect in the IT/e-commerce environment.

You have experience in (agile) software development with Java Content Management Systems like e.g. Adobe Experience Manager (AEM/CQ5), Magnolia or FirstSpirit

A possible content-related role in the future would be in one of the following areas: Technical Consulting, Requirements Engineering, Business Analytics, Technical Product Ownership or System Architecture.

You have good communication skills and enjoy providing technical advice to customers.

Desirable: A successfully completed degree in (business) informatics or comparable training in the field of IT.

You have fluent German and good English skills, both written and spoken.

WHY DICONIUM?

Your life. Your benefits. Your diconium.

We offer you a flexible, positive work environment with a wide range of benefits, perks, rewards and opportunities. Discover new skills and improve your strengths, adapt your working day to your personal lifestyle, celebrate community, sustainability and diversity. And sweeten your working life with awesome perks and benefits!

About the benefits ([diconium Benefits](#))
