Become a pioneer of digital transformation and join our fantastic team.

Enterprise Architect (all genders) Digital Commerce

[Apply now](#)

YOUR TASKS

You are the main contact person in stakeholder management on the customer and diconium side for the purpose of responsibility for organizational developments and business process modeling.

You design business and solution architectures in the automotive environment based on customer and user-specific business cases.

Your focus is on the strategic and methodical development of enterprise architectures and systems, which are used sustainably in the methodology toolbox.

You are jointly responsible for the realization as well as consistency of projects from the theoretical to the operationalization, so that procedures and plans are implemented and positioned for sustainable success.

You represent the architecture perspective in SAFe programme management and participate in 12-week cycles of multi-day PI planning to clarify interdependencies across groups.

YOUR PROFILE

You are enthusiastic about agile project structures, new methodological approaches and a modern technology stack.

You have several years of relevant professional experience as an IT, system, solution or enterprise architect in the digital/e-commerce environment.

You are experienced in designing digital solution architectures and have an understanding of digital business models / economy of scale scenarios.

You are experienced in the implementation of skills for the digitalization of sales processes (e.g. subscription economy, marketplaces, customer experience platforms).

You feel comfortable in this environment: practical applications of different methodological competences, e.g. Enterprise Architecture Management methods, TOGAF, Design-Thinking methods, creative techniques or moderation.

You have strong communication skills, a convincing manner and the ability to convey and implement your architectural vision to different stakeholders/management.

WHY DICONIUM?

Your life. Your benefits. Your diconium.

We offer you a flexible, positive work environment with a wide range of benefits, perks, rewards and opportunities. Discover new skills and improve your strengths, adapt your working day to your personal lifestyle, celebrate community, sustainability and diversity. And sweeten your working life with awesome perks and benefits!
